EDUCATION

Bachelor of Technology in Information Technology Expected 2026
Pimpri Chinchwad College of Engineering, Pune

Higher Secondary Certificate (HSC) – 91.50% 2021

Secondary School Certificate (SSC) – 95.20% 2019

TECHNICAL SKILLS

Programming Languages	C, C++, JavaScript, Python (Basic), Dart, HTML, CSS
Frameworks & Libraries	React, Node.js, FastAPI, Flutter, Tailwind CSS
Developer Tools	Git, GitHub, Postman, TypeScript, Prisma ORM
Databases	MySQL, PostgreSQL, MongoDB
Core Competencies	Data Structures, Algorithms, Operating Systems, Computer Networks, OOP

PROFESSIONAL EXPERIENCE

Software Engineer Jan 2026 – Present
Prasaar Technologies

- Designed and developed a multi-tenant **WhatsApp Business Platform** using the **Meta Cloud API**, supporting client onboarding, template management, campaigns, and real-time messaging.
- Implemented a scalable **webhook processing system** to handle incoming messages, delivery/read statuses, interactive replies, and media events with reliable event processing.
- Built an advanced **WhatsApp Flow Builder** with reusable flow components, dynamic forms, Google Sheets integration, and API-based workflow automation.
- Developed marketing campaign capabilities with **opt-in/opt-out management**, audience filtering, template validation, scheduled broadcasts, and delivery analytics.

Software Development Intern Feb 2025 – Dec 2025
Eitot Technologies

- Developed a cross-platform mobile application using **Flutter** with **GetX** state management, **HTTP/Dio**, and **flutter_secure_storage** for secure authentication and local storage.
- Implemented AI-powered transliteration using **Google Gemini**, caching generated results in the database to minimize repeated API requests and improve performance.
- Collaborated on full-stack feature development, bug fixing, testing, and deployment across multiple production applications.

TECHNICAL PROJECTS

Real-Time Messaging and Calling Platform: Developed a **WebSocket** and **WebRTC**-based chat and calling application using **Node.js/Express**, **Socket.IO**, **Prisma ORM**, and **MySQL**, supporting private and group messaging.

Interactive Data Analytics Platform: Built a full-stack analytics application with a **FastAPI** backend, automated data cleaning, statistical analysis, outlier detection, and a **TypeScript** frontend with responsive visualizations.

Presentation Attack Detection: Developed an iris liveness detection system with Local Binary Patterns (LBP), Gabor Filters, and Random Forest classifier, achieving **92.53** accuracy for biometric authentication.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- **CodeChef 3-Star** – Strong performance in algorithmic problem solving (Profile).
- **Global Rank 123** in CodeChef Starters 146 among 10,000+ participants.
- **2nd Place** – BMC Inter-College Hackathon.
- Solved 300+ algorithmic problems on LeetCode.
- **HackerRank** – c++(5-star), java(4-star), problem solving(2-star) Hackerrank.
